SHOWER DOORS

for Baths that are Light, Lovely and Lasting

... a survey shows that bathrooms require more maintenance and cleaning time than any part of the house ... as much as one-third of housekeeping time is often spent in keeping the bathroom clean.

Gulfspray Shower Doors and Enclosures reduce cleaning time to a minimum because they eliminate almost entirely the annoyance of damp and untidy floors. The doors themselves are easy to clean and will retain their brilliance for the lifetime of the bathroom. No curtains to launder, split or mildew.

Gulfspray Units enhance the appearance of your bathroom. The gleaming metal, in combination with sparkling glass, gives the bathroom just the right touch of practical beauty to set it apart as a place of luxury and distinction. A Gulfspray Shower Unit is just cause for pride and enjoyment.

The moderate price of Gulfspray units makes a shower Door or Enclosure a privilege for all, rather than a luxury for a few. The expense of laundering and replacing shower curtains is permanently eliminated. In the long run, the investment in a Gulfspray Unit will become an actual saving.

Gulfspray Shower Doors and Enclosures are available in either Satin Aluminum, Brite Aluminum, or Chrome-Plated Bronze. All of these finishes are highly satisfactory and selection depends on individual choice.

The use of clear or obscure glass is optional. For illustrations of obscure glass available, see Page 10 of this catalogue.

Plain Top Shower Doors

A simple yet beautiful Gulfspray Door, built to permit space above the door and the top of the opening for ventilation. Standard size 24"x 66" overall.

No. 100—Satin Aluminum

No. 120—Brite Aluminum

No. 150—Chrome Plated Bronze

LEFT

Grille Top Shower Doors

The Grille Top Door is designed to fill the entire shower stall opening, with ample ventilation space provided for by the grille. This shower door is a perfect combination of utility and beauty for the most discriminating taste.

Standard size 24" x 72" overall.

No. 300—Satin Aluminum

No. 320—Brite Aluminum

No. 350—Chrome Plated Bronze

RIGHT

Scroll Top Shower Doors

A handsome solid cast metal scroll at top of the door gives this Gulfspray unit an added note of decoration and distinction. Standard size 24" x 66" plus scroll.

No. 200—Satin Aluminum

No. 220—Brite Aluminum

No. 250—Chrome Plated Bronze

Shower Door with Stationary Panel

Where the width of the shower stall opening exceeds 28", the practical maximum width of a single panel door, it is possible to use a 24" standard width door in conjunction with a stationary panel. This is illustrated by section C-C page nine. The result is not only a practical solution of the problem, but an assembly of real distinctiveness.

No. 400—Satin Aluminum

No. 420—Brite Aluminum

No. 450—Chrome Plated Bronze

ABOVE

4 to 6-Foot Recess Tub Enclosures

For almost all recessed tubs this unit is both practical, beautiful and economical. It is designed for both the standard five to six foot tub and the four foot square type tub. The Door may be located in center as illustrated or on either end. This enclosure can also be furnished with a continuous grille top for added attractiveness at a small additional cost.

No. 500—Satin Aluminum
No. 520—Brite Aluminum
No. 550—Chrome Plated Bronze

RIGHT

4-Foot Special Shaped Tub Enclosures

This type enclosure is designed for the 4-foot special front recess tub. Full protection is afforded the interior of the bathroom from splashing water, and space above the unit permits ample ventilation.

No. 1000—Satin Aluminum
No. 1020—Brite Aluminum
No. 1050—Chrome Plated Bronze

Tub Enclosures

Gulf Spray Tub Enclosures are installed with the same ease as Gulf Spray Shower Doors. Installations can be made in existing rooms as well as in new bathrooms. It is not necessary to remove or refinish any wall surfaces, as the metal frame is thoroughly imbedded in a sturdy, leak-proof mastic that adapts itself to any wall unevenness. Continuous piano-type hinges and scientifically-designed drips, that drain the water back into the tub or shower enclosure, are provided on all Gulf Spray Enclosures and Doors.

LEFT

5 to 6-Foot Corner Tub Enclosures

The corner Tub Enclosure solves the always difficult problem of supporting and maintaining a shower curtain for this type of bathroom layout. With this type enclosure, the unit may be enjoyed either as a shower or a tub. Furthermore, this unit lends a definite note of distinction to the bathroom.

No. 900—Satin Aluminum

No. 920—Brite Aluminum

No. 950—Chrome Plated Bronze

RIGHT

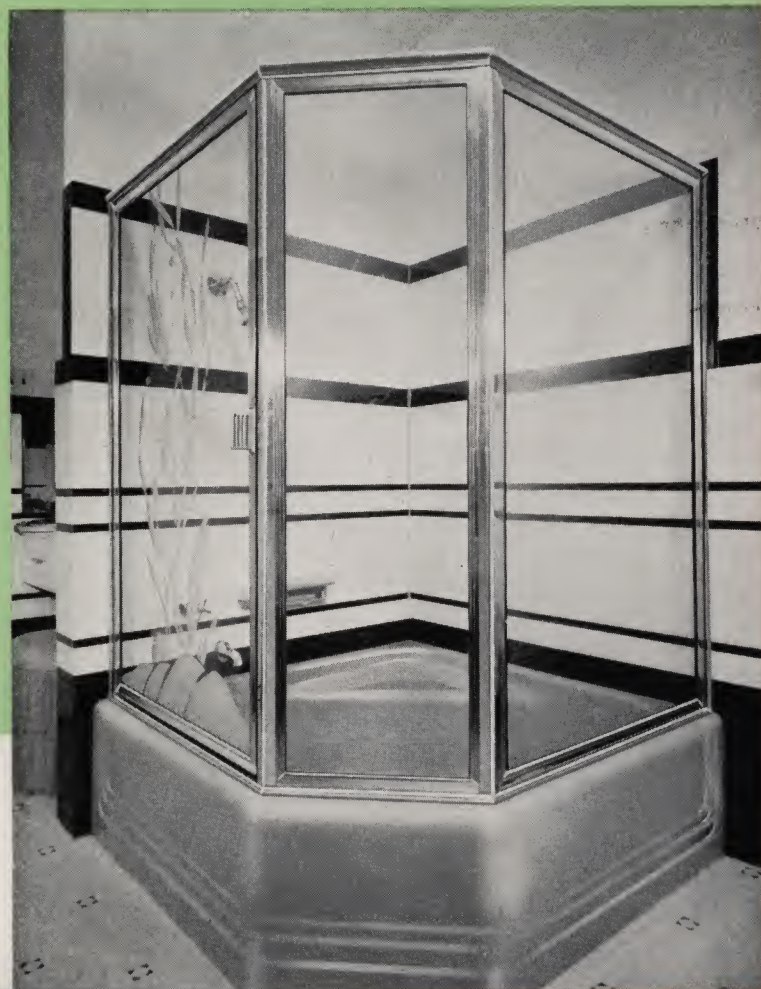

Neo-Angle Tub Enclosures

Gulfspray Neo-Angle Tub Enclosures are easily installed to fit tubs already in use, as they are custom-made to fit either new or existing work. The door may be placed on either side or angle corner depending on personal preference or convenience.

No. 600—Satin Aluminum

No. 620—Brite Aluminum

No. 650—Chrome Plated Bronze

RIGHT

Recess Shower Enclosures

The recess enclosure makes an attractive and practical installation for the bathroom where an ample, roomy shower-stall is desired. The unit has sufficient height to keep all water within the shower and thus prevent splashed bathroom floors and walls.

No. 1100—Satin Aluminum

No. 1120—Brite Aluminum

No. 1150—Chrome Plated Bronze

LEFT

Shower Door with Towel Bar

For added convenience to the bather a special Gulf Spray Towel Bar can be attached to the outside of a shower door unit or an enclosure. The Towel Bar also is illustrated on the scroll top 200 series door pictured on page three.

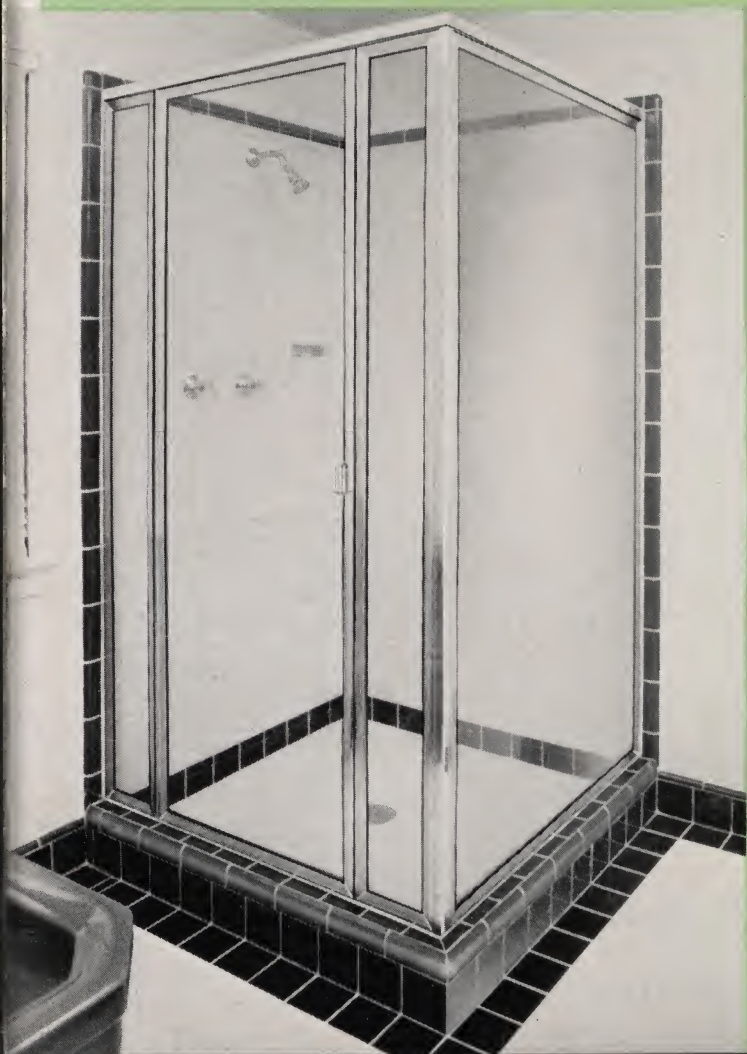

Daylight Enclosures

Angle Type

It is sometimes practical and desirable, in the case of a corner enclosure, to locate the door at an angle, so that space in the bathroom will be saved, and the door may be opened more freely. This type of Gulf Spray unit is of particular benefit where limitation of space prevents the use of a tub.

- No. 800—Satin Aluminum
- No. 820—Brite Aluminum
- No. 850—Chrome Plated Bronze

RIGHT

LEFT

Daylight Enclosures

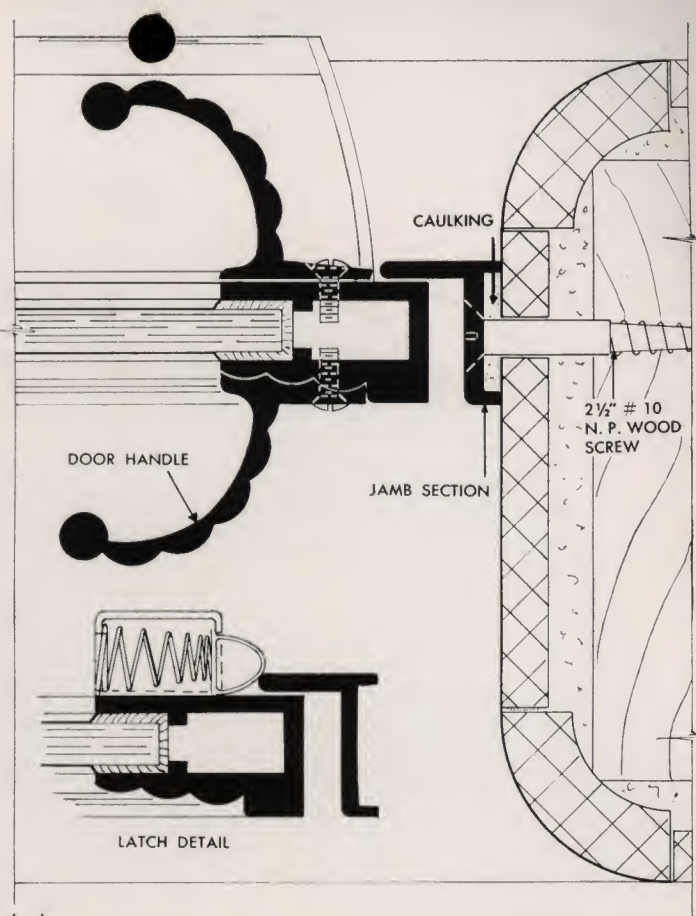

Square Type

Daylight Enclosures save space because the 4-inch walls necessary in building the usual stall are not required. The two walls of the enclosure, being made entirely of glass, permit the interior to be as light and bright as the rest of the bathroom. The use of clear or obscure glass depends on the amount of privacy desired.

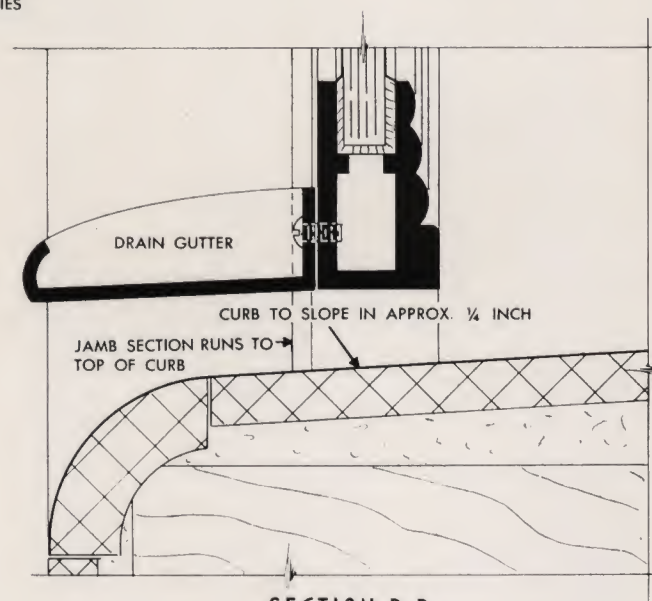

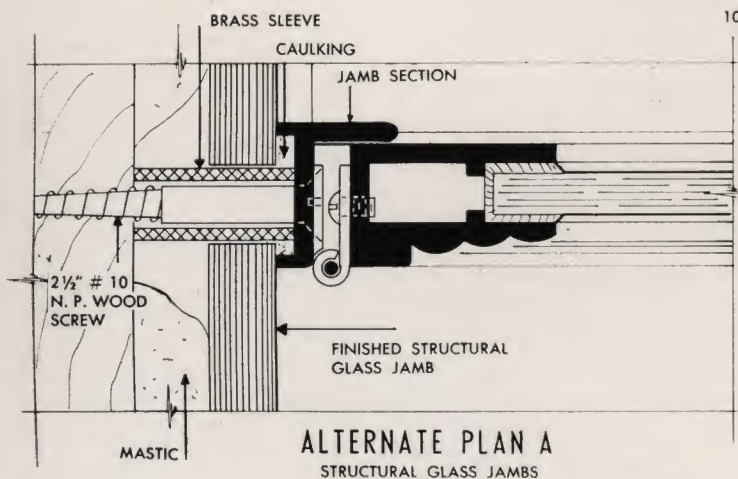

- No. 700—Satin Aluminum
- No. 720—Brite Aluminum
- No. 750—Chrome Plated Bronze

Special Square Type

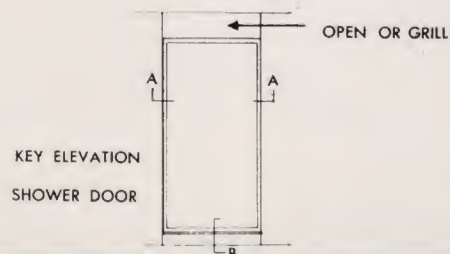

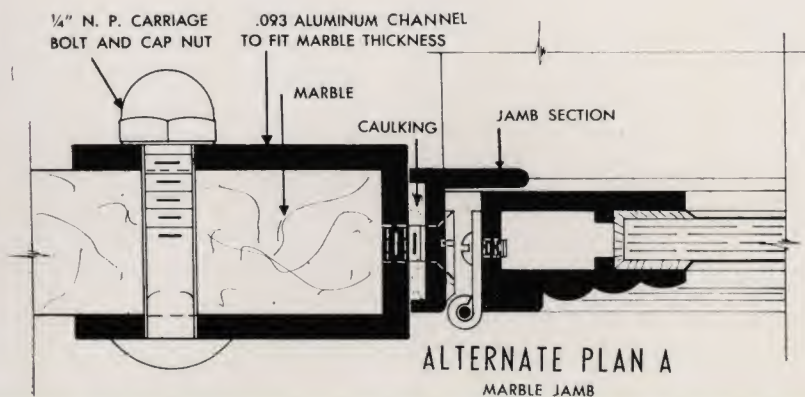

There is also available a three sided enclosure designed for use where a corner enclosure is not practical or where light from three sides is desired. It is a modification of the 700 series Daylight enclosure and is located so that the back of the enclosure is the fixed wall and the other three sides are glass and metal.

Beautiful
CARVED
Designs

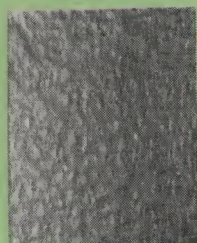

TO ADD BEAUTY AS WELL AS OBSCURITY TO YOUR SHOWER DOOR, one of the illustrated carvings may be used. The designs are permanent, being carved directly into the glass. The designs are easy to keep clean as they are installed with the carving on the outside of the door. These beautifully designed panels will give the bath a definite note of individualism for a small additional investment.

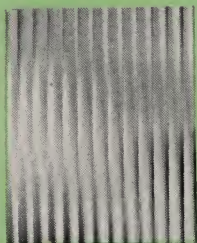

Obscure Glass Patterns

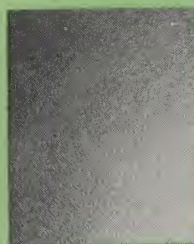

The use of either clear or obscure (patterned) glass in Gulf Spray Shower Doors and Tub Enclosures is optional. The Luminex pattern is the standard obscure glass used but any of the other patterns illustrated may be obtained at a higher cost. It is possible to achieve very pleasing results and additional interest in the bathroom by using a modern pattern glass.

POSTER CASES, BULLETIN BOARDS and MIRRORS

THE GULFSPRAY MIRROR FRAME has met wide acceptance from users of all metal concealed hanger mirrors. The attractive outside frame is the same as that used in other Gulfspray products. The mirror is furnished in plate glass set in cork and rubber fabric and backed with a sheet of 20 gauge galvanized iron. Keyhole slots are located in the back of the frame so that the mirror may be hung flat against the wall with no exposed hangers. This type of mirror is especially adaptable for public toilets in office buildings, filling stations, etc.

GULFSPRAY POSTER CASES AND SHOW CASE DOORS are of the same high quality as Gulfspray Shower Doors and Enclosures. The handsome extruded metal frames, permanent and easy to maintain, combined with clear, smooth glass, make an ideal display unit for the theater or store operator and building manager. Ease of operation is assured by the continuous piano-type hinge which runs the full length of the case to prevent sagging. Concealed type locks serve as protection against disturbance. Each case is custom made to fit the dimensions of the individual requirement. Note construction detail illustrated below.
